<p>The balance of student writing at this level is 80 percent analytical (40 percent argument and 40 percent to explain/inform) and 20 percent narrative, with a mix of on-demand and review-and-revision writing assignments. Building student competence and confidence with technology should be part of instruction.</p> <p align="center">Click here for a deeper explanation of routine, analytical and narrative writing.</p>

Research

This module includes the opportunity for students to produce **one extended project** that uses research to address a significant topic, problem, or issue. This task may entail gathering and synthesizing relevant information *from several additional literary or informational texts in various media or formats* on a particular topic or question drawn from one or more texts from the module.

Students are expected at this stage to:

assess the strengths and limitations of each source in terms of the task, integrate the information gathered in a manner that maintains the flow of ideas, and avoid overreliance on any one source.

Students can present their findings:

in a variety of informal and more formal argumentative or explanatory contexts, either in writing or orally. (***Research aligned with the standards could take one to two weeks of instruction.***)

Ongoing incorporation of research for shorter tasks should also be a regular component of instruction.

*W.12.7 Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
